Product name:	Product code:
Hydraulic Press Brake Machine	CMI-NP-0673

Description

Hydraulic Press Brake Machine is a hydraulic press brake with a 40 tonne ram for accurate bending of sheet metal, designed for sheet metal bending practice and workshop fabrication training.

Technical specification

Weight	approx. 2200 kg

The Hydraulic Press Brake Machine is a hydraulic press brake with a 40 tonne ram for accurate bending of sheet metal. It is built for sheet metal bending practice and workshop fabrication training.

Features

- Hydraulic ram with adjustable stroke
- Back gauge with manual adjustment
- Foot pedal operation
- Angle stop with dial indicator

Technical Specifications

Capacity	40 tonne
Bending length	1600 mm
Mild steel bending	up to 4 mm
Stroke	100 mm
Motor	5.5 kW, 415 V, 3 phase
Throat	200 mm
