

Product name:
PCB Engraver

Product code:
CIVIL-MFS-161-0001

Description

PCB Engraver

Technical specification

The engraver is suitable for rapid production of circuit boards in small quantities in the laboratory. It is capable of drilling, milling, producing blind holes and blind slots, as well as carrying out other machining operations. It can be used to produce not only digital, analog, and mixed digital-analog circuit boards but also PVC, organic glass, and aluminum panels and nameplates. In addition, this engraver is also able to repair and cut the circuit board on which components have been mounted.

Features

1. Processing format: 305mm × 230mm
2. Coaxial depth limit function
3. Use air-cooled high-speed spindle with the speed of 40,000rpm
4. Fast tool changer developed independently by our company and protected by patent
5. Independently-developed, patent-protected precision graver depth adjustment system
6. Overall cast aluminum work surface
7. X, Y, Z three-axis linear stepper motor drive
8. Semi-enclosed structure, easy to operate
9. Power supply: 220V AC/50Hz
