

Product name:
Flexible Manufacturing System Trainer

Product code:
CIVIL-FMS-159-0002

Description

Flexible Manufacturing System Trainer

Technical specification

The flexible manufacturing system trainer includes eight work units or work stations, which are transport station, processing station, detection system, sorting system, heat treatment system, automatic warehousing system, annular workpiece transmission system, and host computer management station.

This training equipment can complete the whole process from workpiece processing, detection, heating, cooling, sorting, to warehousing, truly reproducing the actual industrial manufacturing process.

Experimental Projects

1. Knowledge and Application of Pneumatic Technology

- a. Knowledge of air pump
- b. Knowledge of air source processor
- c. Knowledge of filter
