Product name:	Product code:
Motorised Plate Shearing Machine 6 mm x 1250 mm	CMI-NP-0895

Description

A motorised plate shearing machine capable of cutting mild steel plate up to 6 mm thick across 1250 mm, used for heavy sheet and plate cutting in workshops.

Technical specification

Blade material	Alloy tool steel, four edged
Blade rake angle	1 to 2 degrees
Strokes per minute	approx. 30
Machine weight	approx. 1000 kg

Standard Accessories

- Spare blade set
- Foundation bolts

Motorised Plate Shearing Machine 6 mm x 1250 mm cuts mild steel sheet up to 6 mm thick over a 1250 mm blade length with a clean, square edge. It is commonly used in sheet metal training workshops and fabrication units.

Features

- Fabricated steel frame for rigidity
- High carbon high chromium alloy blades
- Adjustable blade clearance
- Front gauge and back gauge for repeat cuts
- Hold down clamps to prevent plate movement
- Safety finger guard in front of the blade

Technical Specifications

Cutting capacity (mild steel)	6 mm
Cutting length	1250 mm
Drive	Motorised, mechanical clutch
Motor	7.5 HP, 415 V AC 3 phase
