NAUGRA®

Product name:	Product code:
Diesel Plate Compactor 150 kg	CMI-NP-0905

Description

A diesel engine driven vibrating plate compactor of 150 kg for sub base, granular fill and asphalt compaction in roadwork and site preparation.

Technical specification

Travel speed	24 m/min
Engine	Diesel, 5 HP
Compaction depth	up to 350 mm
Fuel tank	2.5 litre

The robust diesel engine and exciter give high compaction force and long working hours. It is a common choice for road repair and foundation base work.

Features

- Air cooled diesel engine
- Recoil start
- Heavy base plate
- Large centrifugal force
- Vibration damped handle
- Rugged guard over drive belt

Technical Specifications

Operating weight	150 kg
Plate size	600 x 450 mm
Centrifugal force	28 kN
Vibration frequency	75 Hz
