Product name:	Product code:
Reversible Vibrating Plate Compactor 300 kg	CMI-NP-0909

Description

A reversible vibrating plate compactor that moves forward and backward at the operator's control, used for compacting soil, gravel and asphalt in road and trench work.

Technical specification

Travel speed	20 to 25 m/min
Engine	Diesel, 6 HP
Compaction depth	up to 600 mm
Fuel tank	3 litre

Twin eccentric weights give forward and reverse travel with a single lever. It suits site compaction of sub base, trenches and larger paved areas.

Features

- Forward and reverse travel by handle lever
- Heavy cast steel base plate
- Anti vibration handle
- Belt guarded exciter
- Folding handle for transport
- Wheel kit for easy movement

Technical Specifications

Operating weight	300 kg
Plate size	700 x 500 mm
Centrifugal force	50 kN
Vibration frequency	68 Hz
