NAUGRA®

Product name:	Product code:
Automatic Concrete Batching Controller Set	CMI-NP-0920

Description

A microprocessor based automatic batching controller with load cells and weighing hoppers for cement, aggregates and water, used to run semi automatic concrete batching plants.

Technical specification

Outputs	Relay for gates and motors
Communication	RS232 for printer
Power supply	230 V AC 50 Hz
Enclosure	Powder coated steel panel

Standard Accessories

- Printer interface cable

The controller stores mix recipes, weighs each material in sequence and operates discharge gates automatically. It reduces manual error and records batch data for quality records.

Features

- Microprocessor controller with recipe memory
- Four to six material weighing channels
- Automatic gate sequencing
- Batch report printing
- Tolerance and alarm settings
- Panel mounted with touch keys

Technical Specifications

Weighing channels	up to 6
Recipes stored	20
Accuracy	+/- 0.5 percent
Display	LCD with keypad
