Product name:	Product code:
Part Marking Station with Vision Inspection	CMI-NP-0998

Description

A marking station fitted with a camera that checks the quality and position of each mark, used to teach vision inspection and closed loop quality control.

Technical specification

Software	Vision with OCR and code reading
Interface	Ethernet and digital I/O
Cycle time	approx. 5 s
Experiments	Mark verification and rejection
Power supply	230 V AC, 50 Hz

After marking, a camera reads the code and compares it with the expected data. Good and bad parts are separated automatically.
