NAUGRA®

Product name:	Product code:
CAN-BUS Instrument Cluster and Gateway Trainer	CMI-NP-1017

Description

A trainer with instrument cluster, gateway module and bus nodes that shows how speed, rpm and warning signals travel over CAN, used in automobile electronics courses.

Technical specification

Test points	CAN-H, CAN-L
Faults	6 nos
Supply	12 V DC
Experiments	Signal routing and display
Power supply	230 V AC, 50 Hz

Students change simulated engine speed and see the cluster react. They study gateway routing between comfort and drive CAN buses.

Features

- Instrument cluster with gauges
- Gateway module
- Drive and comfort bus
- Signal simulator for speed and rpm
- Warning lamps
- Fault insertion

Technical Specifications

Cluster	Analog gauges with warning lamps
Gateway	2 bus routing
Bus speeds	500 kbit/s and 100 kbit/s
Simulator	Speed, rpm, temperature
