NAUGRA®

Product name:	Product code:
Earthing System Training Set	CMI-NP-1055

Description

An earthing training set with earth electrodes, a resistance tester and fault demonstration, used to teach earth resistance measurement and protection.

Technical specification

Fault demo	Phase to earth
Protection	RCCB
Case	Carry case
Experiments	Earth resistance, touch voltage
Power supply	230 V AC, 50 Hz

Students install electrodes, measure their resistance with the fall of potential method and study how earthing protects equipment.

NAUGRA®
Civil Laboratory Equipment Manufacturers and Suppliers India Civil Lab Exportrs India

Features

- Earth electrode set
- Digital earth resistance tester
- Auxiliary electrodes
- Fault simulation
- Measuring cables
- Test report format

Technical Specifications

Electrodes	Rod, plate and pipe type
Tester	0 to 2000 ohm, 3 ranges
Method	Fall of potential
Leads	Reeled, 20 m
