NAUGRA®

Product name:	**Product code:**
Electric Shock Protection Demonstration Panel	CMI-NP-1056

Description

A demonstration panel showing touch voltage, body current and protective devices, used to teach hazards of electric shock and safe practice.

Technical specification

Panel	Steel
Safety	Current limited
Experiments	Touch voltage, trip response
Power supply	230 V AC, 50 Hz

The panel uses a safe simulated body path and meters to show how shock currents arise and how protection responds.

Features

- Simulated body resistance
- Touch voltage meter
- Protective device sockets
- Isolation transformer
- Warning lamps
- Safety training chart

Technical Specifications

Source	Isolated low voltage
Body model	1 kilo ohm adjustable
Meters	Voltage and current
Protection	RCCB, MCB
Indicator	Lamps and buzzer
