Product name:	Product code:
Engine Fault Simulation Training Panel	CMI-NP-1081

Description

A fault simulation panel with insertable faults on engine control circuits, used to teach systematic engine diagnosis.

Technical specification

Instructor key	Keyed switch
Experiments	Fault diagnosis
Power supply	230 V AC, 50 Hz

Instructors insert faults such as open sensor, short and relay failure, and students find them using test equipment.

Features

- Fault insertion switches
- Engine control circuit
- Test sockets
- Fault code reading
- Hidden fault key
- Diagnostic worksheets

Technical Specifications

Faults	20 nos
Circuits	Fuel, ignition, sensors
Test points	4 mm sockets
Scan tool socket	OBD II
Panel	Steel with diagram
Supply	12 V DC
