NAUGRA®

Product name:	**Product code:**
Load Cell and Strain Gauge Force Measurement Trainer	CMI-NP-1135

Description

Trainer with strain gauge load cell, bridge amplifier and digital indicator to study force measurement, calibration with weights and Wheatstone bridge balancing. Key highlights include strain gauge bridge circuit and calibration with dead weights.

Technical specification

Display	3.5 digit
Weights	100 g x 10
Excitation	5 V DC
Accuracy	+/-0.5 pct FS
Panel	400 x 300 mm

Standard Accessories

- Weight set
- Manual

Trainer with strain gauge load cell, bridge amplifier and digital indicator to study force measurement, calibration with weights and Wheatstone bridge balancing. Key highlights include strain gauge bridge circuit and calibration with dead weights.

Features

- Strain gauge bridge circuit
- Calibration with dead weights
- Zero and gain adjustment
- Digital display
- Open signal terminals

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Load cell	0-5 kg, 2 mV/V
Amplifier	Instrumentation, gain adjustable
