NAUGRA®

Product name:	Product code:
RTD and Thermocouple Temperature Sensor Trainer	CMI-NP-1139

Description

Trainer with Pt100 RTD, thermocouple and thermistor in a heated bath to compare temperature sensor outputs, linearity and response time with a reference thermometer. Key highlights include pt100, thermocouple and thermistor and heated bath with controller.

Technical specification

Heater	500 W with PID
Display	Digital, 0.1 deg C
Outputs	Voltage and 4-20 mA
Dimensions	450 x 350 x 300 mm

Standard Accessories

- Spare probes
- Manual

Trainer with Pt100 RTD, thermocouple and thermistor in a heated bath to compare temperature sensor outputs, linearity and response time with a reference thermometer. Key highlights include pt100, thermocouple and thermistor and heated bath with controller.

Features

- Pt100, thermocouple and thermistor
- Heated bath with controller
- Signal conditioners
- Digital temperature display
- Response time study

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Sensors	Pt100, K type, NTC
Range	Ambient to 150 deg C
