Product name:	Product code:
Frequency Converter Fault Diagnosis Trainer	CMI-NP-1140

Description

Trainer with a frequency converter, motor and fault switches that simulate overcurrent, overvoltage and sensor faults for practising drive troubleshooting and parameter correction. Key highlights include ten simulated drive faults and fault code display.

Technical specification

Faults	10 switchable
Display	Keypad with fault codes
Test points	4 mm
Dimensions	900 x 550 x 450 mm

Standard Accessories

- Test leads
- Manual

Trainer with a frequency converter, motor and fault switches that simulate overcurrent, overvoltage and sensor faults for practising drive troubleshooting and parameter correction. Key highlights include ten simulated drive faults and fault code display.

Features

- Ten simulated drive faults
- Fault code display
- Parameter reset exercises
- Motor and load coupling
- Test points for measurement

Technical Specifications

Supply	415 V AC, 3 phase
Drive	1.5 kW
Motor	1.5 kW, 1440 rpm
