Product name:	Product code:
Hydraulic Filter and Contamination Diagnosis Training Unit	CMI-NP-1148

Description

Unit with filters, a differential pressure indicator and oil sampling ports for learning how contamination affects hydraulic systems and how to monitor filter condition. Key highlights include clogging indicator filter and oil sample ports.

Technical specification

Sensors	Differential pressure, temperature
Dimensions	1200 x 600 x 1500 mm

Standard Accessories

- Sample bottles
- Manual

Unit with filters, a differential pressure indicator and oil sampling ports for learning how contamination affects hydraulic systems and how to monitor filter condition. Key highlights include clogging indicator filter and oil sample ports.

Features

- Clogging indicator filter
- Oil sample ports
- Particle contamination demonstration
- Return line and pressure filters
- Oil temperature display

Technical Specifications

Supply	415 V AC, 3 phase
Filters	Pressure and return, 10 micron
Pump	Vane, 2.2 kW
Pressure	0-100 bar
Tank	40 L with heater
