Product name:	Product code:
Electro Pneumatic Hydraulic Combined Circuit Trainer	CMI-NP-1151

Description

Trainer combining pneumatic and hydraulic circuits on one platform with PLC control to teach selection and integration of fluid power actuators in machines. Key highlights include pneumatic and hydraulic circuits on one board and pLC programming.

Technical specification

PLC	24 I/O
Cylinders	2 pneumatic, 2 hydraulic
Valves	Solenoid, 24 V DC
Panel	Aluminium profile 1200 x 800 mm

Standard Accessories

- Tubing and hose set
- Manual

Trainer combining pneumatic and hydraulic circuits on one platform with PLC control to teach selection and integration of fluid power actuators in machines. Key highlights include pneumatic and hydraulic circuits on one board and pLC programming.

Features

- Pneumatic and hydraulic circuits on one board
- PLC programming
- Solenoid valve control
- Pressure gauges
- Quick connect fittings

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Pneumatic	6 bar
Hydraulic	0-60 bar
