Product name:	Product code:
Electrical Panel Wiring and Fault Finding Training Platform	CMI-NP-1193

Description

Platform with a motor control panel, terminals and switchgear for wiring, testing and troubleshooting circuits in electrical installation and maintenance training. Key highlights include contactors, MCB and overload relays and terminal blocks and cable ducts.

Technical specification

Overload relay	0.63-1 A
Faults	8
Motor	0.37 kW
Panel	800 x 600 mm

Standard Accessories

- Test leads
- Manual

Platform with a motor control panel, terminals and switchgear for wiring, testing and troubleshooting circuits in electrical installation and maintenance training. Key highlights include contactors, MCB and overload relays and terminal blocks and cable ducts.

Features

- Contactors, MCB and overload relays
- Terminal blocks and cable ducts
- Insertable faults
- Insulation and continuity testing
- Three-phase motor load

Technical Specifications

Supply	415 V AC, 3 phase
MCB	3 pole, 16 A
Contactors	3 nos
