Product name:	Product code:
Electrical Troubleshooting Skills Assessment System	CMI-NP-1230

Description

System with an operational electrical panel and randomly inserted faults for timing and scoring a candidate's fault finding in power and control circuits. Key highlights include random fault insertion and power and control circuit sections.

Technical specification

Test points	4 mm
Panel	1000 x 700 mm

Standard Accessories

- Test leads
- Manual

System with an operational electrical panel and randomly inserted faults for timing and scoring a candidate's fault finding in power and control circuits. Key highlights include random fault insertion and power and control circuit sections.

Features

- Random fault insertion
- Power and control circuit sections
- Digital fault timer
- Score sheet
- Multimeter test points

Technical Specifications

Supply	415 V AC, 3 phase
Faults	20
Control voltage	24 V DC
Timer	Digital
Meters	Voltmeter, ammeter
