Product name:	Product code:
Electrical Safety and Earthing Resistance Test Kit	CMI-NP-1267

Description

Kit with earth tester, insulation tester and continuity meter for teaching measurement of earth electrode resistance and insulation of electrical installations. Key highlights include earth resistance measurement and insulation resistance test.

Technical specification

Battery	8 x AA
Case	Rugged carry case

Standard Accessories

- Test leads
- Spikes

Kit with earth tester, insulation tester and continuity meter for teaching measurement of earth electrode resistance and insulation of electrical installations. Key highlights include earth resistance measurement and insulation resistance test.

Features

- Earth resistance measurement
- Insulation resistance test
- Auxiliary probes and leads
- Digital display
- Carry case

Technical Specifications

Earth tester	0-2000 ohm, 3 range
Insulation tester	500 V, 0-2000 Mohm
Continuity	200 mA
Probes	2 auxiliary spikes
Leads	20 m reels
