Product name:	Product code:
Impulse Voltage Generator Training Unit	CMI-NP-1276

Description

Marx type impulse generator with chargeable capacitors and spark gaps for demonstrating lightning impulse waveforms on high voltage apparatus. Key highlights include multi-stage Marx circuit and front and tail resistors.

Technical specification

Charging unit	0-25 kV DC
Divider	Resistive

Standard Accessories

- Earthing rod
- Manual

Marx type impulse generator with chargeable capacitors and spark gaps for demonstrating lightning impulse waveforms on high voltage apparatus. Key highlights include multi-stage Marx circuit and front and tail resistors.

Features

- Multi-stage Marx circuit
- Front and tail resistors
- Trigger spark gap
- Impulse divider
- Oscilloscope output

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Stages	4
Output	0-100 kV
Waveform	1.2/50 us
Energy	200 J
