NAUGRA®

Product name:	Product code:
SCADA Building Automation Training Model	CMI-NP-1285

Description

Model building with sensors and actuators for lighting, HVAC and access control monitored and controlled through SCADA for learning building management. Key highlights include model building with lighting and HVAC and occupancy and temperature sensors.

Technical specification

Actuators	Lamps, fan, damper
SCADA	PC software
Model	700 x 500 x 400 mm
Network	Ethernet

Standard Accessories

- Ethernet cable
- Manual

Model building with sensors and actuators for lighting, HVAC and access control monitored and controlled through SCADA for learning building management. Key highlights include model building with lighting and HVAC and occupancy and temperature sensors.

Features

- Model building with lighting and HVAC
- Occupancy and temperature sensors
- SCADA mimic screen
- Scheduling functions
- Alarm management

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Controller	PLC with BACnet or Modbus
Sensors	Temperature, light, PIR
