NAUGRA®

Product name:	Product code:
Digital Electronics and Logic Gates Training System	CMI-NP-1290

Description

Trainer for building and testing logic gates, flip-flops, counters and combinational circuits on breadboard with built-in supply and indicators. Key highlights include breadboard with logic ICs and data switches and LED indicators.

Technical specification

Display	2 seven segment
Breadboard	2000 tie points

Standard Accessories

- IC set
- Patch cords

Trainer for building and testing logic gates, flip-flops, counters and combinational circuits on breadboard with built-in supply and indicators. Key highlights include breadboard with logic ICs and data switches and LED indicators.

Features

- Breadboard with logic ICs
- Data switches and LED indicators
- Pulse and clock generator
- Built-in 5 V supply
- Seven segment display

Technical Specifications

Supply	230 V AC, 50 Hz, single phase
Power	+5 V, 1 A
Clock	1 Hz to 100 kHz
Data switches	8 nos
LED	8 nos
