Product name:	Product code:
Analogue Transistor Amplifier Trainer	CMI-NP-1308

Description

Analogue Transistor Amplifier Trainer is a bench trainer designed for studying common emitter, common collector and multistage amplifier circuits.

Technical specification

Test Points	2 mm sockets
Power Supply	230 V AC, 50 Hz

Standard Accessories

- Patch cords
- Instruction manual

The Analogue Transistor Amplifier Trainer is a bench trainer built for studying common emitter, common collector and multistage amplifier circuits.

Features

- Selectable single and two stage amplifier circuits
- Variable biasing with potentiometers
- Frequency response measurement points
- Built-in sine wave source
- Rugged panel with circuit symbols

Technical Specifications

Transistors	BC547 and 2N2222 type
Supply	+/-12 V DC, 500 mA
Input Signal	1 kHz sine, adjustable 0 to 100 mV
Coupling Capacitors	1 uF to 100 uF
Load Resistors	switchable
