Product name:	Product code:
Electrical Measurement and Fault Finding Trainer	CMI-NP-1316

Description

Electrical Measurement and Fault Finding Trainer is a training system designed for measuring voltage, current, power and finding faults in simple circuits.

Technical specification

Panel	powder coated steel
Supply	230 V AC, 50 Hz

Standard Accessories

- Multimeter
- Test leads
- Manual

The Electrical Measurement and Fault Finding Trainer is a training system built for measuring voltage, current, power and finding faults in simple circuits.

Features

- Includes analogue and digital meters
- Fault insertion switches under key lock
- Series, parallel and lighting circuits
- Teaches use of multimeter and clamp meter
- Robust bench unit

Technical Specifications

Voltmeter	0 to 300 V AC
Ammeter	0 to 5 A AC
Wattmeter	0 to 1000 W
Fault Switches	8 nos
Loads	lamp bank 5 x 40 W
