Product name:	Product code:
Industrial Lighting Circuit Training Panel	CMI-NP-1317

Description

Industrial Lighting Circuit Training Panel is a training panel designed for wiring and testing fluorescent, LED, sodium vapour and emergency lighting circuits.

Technical specification

Supply	230 V AC, 50 Hz
Fault Switches	4 nos

Standard Accessories

- Lamp set
- Manual

The Industrial Lighting Circuit Training Panel is a training panel built for wiring and testing fluorescent, LED, sodium vapour and emergency lighting circuits.

Features

- Includes choke, starter and ballast circuits
- Wide range of lamp types
- Open terminal wiring
- Includes timer and photocell control
- Safe low-voltage fault simulation

Technical Specifications

Lamps	tube light, LED, CFL, HPSV
Controls	photocell and timer
Protection	MCB 10 A
Board Size	1200 x 800 mm
Mounting	steel stand
