Product name:	Product code:
Single Phase Transformer and Rectifier Wiring Trainer	CMI-NP-1321

Description

Single Phase Transformer and Rectifier Wiring Trainer is a training unit designed for connecting and testing single phase transformers and rectifier loads.

Technical specification

Filter Capacitor	2200 uF
Supply	230 V AC, 50 Hz

Standard Accessories

- Test leads
- Manual

The Single Phase Transformer and Rectifier Wiring Trainer is a training unit built for connecting and testing single phase transformers and rectifier loads.

Features

- Open connections for primary and secondary windings
- Step up and step down tapping
- Includes bridge rectifier and filter
- Meters for load measurement
- Short circuit protected

Technical Specifications

Transformer	230 V/0-12-24 V, 100 VA
Taps	12 V, 24 V
Rectifier	bridge, 5 A
Voltmeter	0 to 300 V AC
Ammeter	0 to 5 A
