Product name:
Robot Programming and Simulation Training Software Station

Product code:
CMI-NP-1329

Description

Robot Programming and Simulation Training Software Station is a training station designed for offline programming and simulation of articulated robot cells.

Technical specification

Exercises	20 lessons
Connection	USB and LAN
Supply	230 V AC, 50 Hz

Standard Accessories

- Computer
- Licence key
- Manual

The Robot Programming and Simulation Training Software Station is a training station built for offline programming and simulation of articulated robot cells.

Features

- Compatible with 3D simulation software
- Compatible with real robot arm
- Teaching exercises and trajectory planning
- Includes safety interlock modules
- Suited to classroom use

Technical Specifications

Software	3D robot simulation
Languages	block and script based
Computer	i5, 8 GB RAM, 21 inch monitor
Robot Interface	Ethernet
