Product name:	Product code:
Net Metering and Energy Meter Training Panel	CMI-NP-1334

Description

Net Metering and Energy Meter Training Panel is a training panel designed for studying bidirectional energy metering for grid connected solar plants.

Technical specification

Display	LCD
Panel	powder coated MS

Standard Accessories

- Test leads
- Manual

The Net Metering and Energy Meter Training Panel is a training panel built for studying bidirectional energy metering for grid connected solar plants.

Features

- Bidirectional digital energy meter
- Import and export measurement
- Load bank for testing
- Includes MCB and isolator
- Clear wiring diagram

Technical Specifications

Meter	bidirectional single phase, class 1
Voltage	230 V AC
Current	10-40 A
Load	lamp load bank 1 kW
Protection	MCB and surge arrester
