NAUGRA®

Product name:	Product code:
Motor Insulation and Winding Resistance Testing Kit	CMI-NP-1371

Description

Motor Insulation and Winding Resistance Testing Kit is a testing kit designed for measuring insulation resistance, winding resistance and continuity of motor windings.

Technical specification

Case	ABS
Power Supply	230 V AC, 50 Hz

Standard Accessories

- Test leads
- Manual

The Motor Insulation and Winding Resistance Testing Kit is a testing kit built for measuring insulation resistance, winding resistance and continuity of motor windings.

Features

- Insulation tester and micro-ohmmeter
- Test motor and transformer
- Clear test procedures
- Safe operation
- Carry case

Technical Specifications

Insulation Tester	500 V/1000 V DC, 0 to 2 GOhm
Micro-ohmmeter	0 to 200 Ohm
Test Motor	0.37 kW
Test Transformer	100 VA
Leads	5 pairs
