Product name:	Product code:
Infrared Obstacle and Proximity Detection Trainer	CMI-NP-1379

Description

Infrared Obstacle and Proximity Detection Trainer is a trainer designed for experiments with infrared reflection, ranging and proximity switching.

Technical specification

Display	digital voltmeter
Base	ABS

Standard Accessories

- Cables
- Manual

The Infrared Obstacle and Proximity Detection Trainer is a trainer built for experiments with infrared reflection, ranging and proximity switching.

Features

- Terminal and jack for all modules
- Adjustable gain
- Movable target
- LED output
- Oscilloscope test points

Technical Specifications

Wavelength	940 nm
Range	5 to 300 mm
Supply	12 V DC
Output	analogue and digital
Targets	3 surfaces
