NAUGRA®

Product name:	Product code:
Optical Encoder and Rotary Position Trainer	CMI-NP-1382

Description

Optical Encoder and Rotary Position Trainer is a trainer designed for studying incremental and absolute rotary encoders with a motor.

Technical specification

Coupling	flexible
Base	MS

Standard Accessories

- Cables
- Manual

The Optical Encoder and Rotary Position Trainer is a trainer built for studying incremental and absolute rotary encoders with a motor.

Features

- Incremental and absolute encoders
- Motor with coupling
- Counter and display
- Direction detection
- Includes oscilloscope outputs

Technical Specifications

Encoder	360 ppr incremental, 10 bit absolute
Motor	24 V DC
Display	digital counter
Output Signals	A, B, Z
Supply	24 V DC
