Product name:	Product code:
Robot Belt Grinding Training Station	CMI-NP-1417

Description

Robot Belt Grinding Training Station is a training station designed for learning robotic belt grinding of curved and flat parts.

Technical specification

Standard Accessories

- Belts
- Sample parts
- Manual

The Robot Belt Grinding Training Station is a training station built for learning robotic belt grinding of curved and flat parts.

Features

- Belt grinder with contact wheel
- Robot with parallel gripper
- Adjustable belt tension
- Dust extraction
- Sample parts
