NAUGRA®

Product name:	Product code:
Directional Coupler and Magic Tee Microwave Study Kit	CMI-NP-1462

Description

Directional Coupler and Magic Tee Microwave Study Kit is a study kit designed for measuring coupling, directivity, isolation and tee characteristics.

Technical specification

VSWR	less than 1.1
Load	matched

Standard Accessories

- Waveguide stands
- Manual

The Directional Coupler and Magic Tee Microwave Study Kit is a study kit built for measuring coupling, directivity, isolation and tee characteristics.

Features

- Directional coupler
- Magic tee and E-plane H-plane tees
- Matched loads
- Detector mount
- Bench setup

Technical Specifications

Frequency	8.2 to 12.4 GHz
Coupling	20 dB
Directivity	30 dB
Waveguide	WR-90
Components	coupler, magic tee, E-tee, H-tee
