Product name:	Product code:
Microstrip Antenna and Patch Antenna Training Kit	CMI-NP-1465

Description

Microstrip Antenna and Patch Antenna Training Kit is a training kit designed for studying microstrip patch antennas, return loss and radiation.

Technical specification

Mount	rotational
Impedance	50 Ohm

Standard Accessories

- SMA cables
- Manual

The Microstrip Antenna and Patch Antenna Training Kit is a training kit built for studying microstrip patch antennas, return loss and radiation.

Features

- Patch antenna boards
- Network analyser connection
- Rotating mount
- Different substrates
- Compact

Technical Specifications

Frequency	2.4 GHz and 5.8 GHz
Substrate	FR4
Gain	6 dBi typical
Boards	4 types
Connector	SMA
