NAUGRA®

Product name:	Product code:
Synchronous Motor With Exciter	EEA0002

Description

Synchronous Motor With Exciter

Technical specification

- Terminal box is properly engraved with all terminals.
- Excellent quality carbon bushes are used in rings of gun metal slips.
- For the high insulation strength, field windings and armature are impregnated in vacuum pressure
- For mechanical loading ratings: 415V, 1500RPM, 2H.P to 5H.P directly coupled with exciter.

With the help of years of experience, we hold expertise in manufacturing and supplying the Synchronous Motor with Exciter in accordance with industrial standards. These motors are equipped with Excitor that supplies the efficient power for low cost. We offer these motors in various grades, sizes and capacities as per the requirements of clients. These motors are used in various industries like engineering, chemical, steel plant, pharmaceuticals and other as per exact requirements.

Features:

- Electrical loading: D.C Generator fitted with motor and exciter on similar channel basis.
- Mechanical loadings: loading arrangements by the help of pulley of the synch motors with exciters.
- Type of self Synchronizing
- Stamping of armature with high grade silicon
- Poles shoes offered in deepener windings
- For trouble free and longer life operations large size of bearings are used
- Dynamic balanced slanted rotor used for the low noise
- Brush holders in constant/uniform pressure.
