Product name:	Product code:
Thermal Conductivity of Metal Rod Apparatus	CMI-NP-1514

Description

Thermal Conductivity of Metal Rod Apparatus is an apparatus designed for measuring thermal conductivity of a metal bar.

Technical specification

Standard Accessories

- Thermocouples
- Manual

The Thermal Conductivity of Metal Rod Apparatus is an apparatus built for measuring thermal conductivity of a metal bar.

Features

- Insulated bar with thermocouples
- Heater at one end
- Cooling water jacket
- Digital temperature display
- Dimmerstat

Technical Specifications

Bar	copper, 25 mm dia., 500 mm
Thermocouples	8 nos
Heater	250 W
Cooling Jacket	water
Display	digital
Insulation	asbestos free
Power Supply	230 V AC, 50 Hz
