Product name:	Product code:
Pyrolysis and Waste Incineration Demonstration Unit	CMI-NP-1519

Description

Pyrolysis and Waste Incineration Demonstration Unit is a demonstration unit designed for studying thermal decomposition and incineration of solid waste.

Technical specification

Controller	PID
Power Supply	230 V AC, 50 Hz

Standard Accessories

- Gas bag
- Manual

The Pyrolysis and Waste Incineration Demonstration Unit is a demonstration unit built for studying thermal decomposition and incineration of solid waste.

Features

- Furnace and type heater
- Condenser
- Gas collection
- Temperature controller
- Safety valves

Technical Specifications

Reactor	stainless steel, 1 litre
Temperature	up to 800 deg C
Heater	3 kW
Condenser	water cooled
Gas Collector	bag
