Product name:	Product code:
Computer Aided Design Software Lab Package	CMI-NP-1562

Description

Computer Aided Design Software Lab Package is a licensed 2D and 3D parametric modelling software package with a classroom installation for mechanical design students. It is used for teaching part modelling, assembly and drafting.

Technical specification

File Formats	STEP, IGES, DXF, STL
Operating System	Windows 10 or 11
Delivery	Installation media and key

Computer Aided Design Software Lab Package is a licensed 2D and 3D parametric modelling software package with a classroom installation for mechanical design students. It is designed for teaching part modelling, assembly and drafting. Key highlights include parametric solid and surface modelling, assembly and drafting modules and sheet metal and weldment tools.

Features

- Parametric solid and surface modelling
- Assembly and drafting modules
- Sheet metal and weldment tools
- Import and export of STEP and IGES files
- Classroom network licence

Technical Specifications

Licence Type	Network, 30 seats
Modelling	2D and 3D parametric
Modules	Part, assembly, drawing
