Product name:	Product code:
Delta Parallel Robot Trainer	CMI-NP-1572

Description

Delta Parallel Robot Trainer is a three-arm delta robot with vacuum gripper and controller for high speed pick and place demonstrations. It is used for teaching parallel kinematics and fast sorting tasks.

Technical specification

Gripper	Vacuum
Controller	PC based
Power Supply	230 V AC, 50 Hz, single phase

Delta Parallel Robot Trainer is a three-arm delta robot with vacuum gripper and controller for high speed pick and place demonstrations. It is designed for teaching parallel kinematics and fast sorting tasks. Key highlights include three lightweight carbon arms, servo motor drive and vacuum suction gripper.

Features

- Three lightweight carbon arms
- Servo motor drive
- Vacuum suction gripper
- Conveyor integration ready
- Programming software

Technical Specifications

Axes	3 plus rotation
Payload	500 g
Work Radius	250 mm
Repeatability	+/-0.1 mm
