Product name:	Product code:
Mechatronics Conveyor Sorting Trainer	CMI-NP-1573

Description

Mechatronics Conveyor Sorting Trainer is a conveyor with sensors, pneumatic pushers and PLC for sorting parts by material and colour. It is used for training in automated sorting and PLC based control.

Technical specification

Air Supply	6 bar
Frame	Aluminium profile
Power Supply	230 V AC, 50 Hz, single phase

Mechatronics Conveyor Sorting Trainer is a conveyor with sensors, pneumatic pushers and PLC for sorting parts by material and colour. It is designed for training in automated sorting and PLC based control. Key highlights include belt conveyor with DC motor, inductive, capacitive and colour sensors and pneumatic pusher cylinders.

Features

- Belt conveyor with DC motor
- Inductive, capacitive and colour sensors
- Pneumatic pusher cylinders
- PLC with I/O terminals
- Aluminium profile frame

Technical Specifications

Conveyor Length	800 mm
Sensors	Inductive, capacitive, optical
Actuators	Double acting cylinders
Controller	PLC
