Product name:	Product code:
Biochemical Oxygen Demand Incubator	CMI-NP-1581

Description

Biochemical Oxygen Demand Incubator is a refrigerated incubator maintaining 20 deg C for BOD tests. It is used for incubating water samples for BOD determination as per standard method.

Technical specification

Shelves	3
Controller	PID
Power Supply	230 V AC, 50 Hz, single phase

Biochemical Oxygen Demand Incubator is a refrigerated incubator maintaining 20 deg C for BOD tests. It is designed for incubating water samples for BOD determination as per standard method. Key highlights include digital temperature controller, stainless steel chamber and adjustable shelves.

Features

- Digital temperature controller
- Stainless steel chamber
- Adjustable shelves
- Compressor cooling
- Heater for ambient control

Technical Specifications

Capacity	165 litre
Temperature	5 to 50 deg C
Accuracy	+/-0.5 deg C
Chamber	Stainless steel
