Product name:	Product code:
Vocational Pipe Bending Machine	CMI-NP-1618

Description

Vocational Pipe Bending Machine is a hydraulic bender with formers for bending pipes. It is used for practising bending of copper and steel pipes in plumbing.

Technical specification

Pump	Manual
Operating Environment	Indoor laboratory, 10 to 40 deg C

Vocational Pipe Bending Machine is a hydraulic bender with formers for bending pipes. It is designed for practising bending of copper and steel pipes in plumbing. Key highlights include hydraulic ram, formers of various radii and hand pump.

Features

- Hydraulic ram
- Formers of various radii
- Hand pump
- Portable design for easy movement
- Angle scale

Technical Specifications

Pipe Range	15 to 50 mm
Bending Angle	0 to 180 deg
Force	12 tons
Material	Steel, painted
