Product name:	Product code:
Vocational Batch Distillation Training Unit	CMI-NP-1638

Description

Vocational Batch Distillation Training Unit is a glass distillation apparatus with a boiler and condenser. It is used for separating mixtures by batch distillation.

Technical specification

Power Supply	230 V AC, 50 Hz, single phase

Vocational Batch Distillation Training Unit is a glass distillation apparatus with a boiler and condenser. It is designed for separating mixtures by batch distillation. Key highlights include glass column, heating mantle and condenser.

Features

- Glass column
- Heating mantle
- Integrated condenser for reliable use
- Integrated receiver for reliable use
- Temperature indicator

Technical Specifications

Column	40 mm
Boiler	3 litre
Heater	1 kW
Range	0 to 200 deg C
Condenser	Glass
