NAUGRA®

Product name:	**Product code:**
PID Tuning Simulation Trainer	CMI-NP-1672

Description

PID Tuning Simulation Trainer is a bench unit with simulated process. It is used for practising PID tuning rules.

Technical specification

PID Tuning Simulation Trainer is a bench unit with simulated process. It is designed for practising PID tuning rules. Key highlights include process simulator, pID and scope.

Features

- Process simulator
- Integrated pid for reliable use
- Integrated scope for reliable use
- Integrated software for reliable use
- Integrated switches for reliable use

Technical Specifications

Process	First order plus dead time
Controller	PID
Output	4 to 20 mA
Display	LCD
Interface	USB
Power Supply	230 V AC, 50 Hz, single phase
