Product name:	Product code:
Temperature Control Process Trainer	CMI-NP-1676

Description

Temperature Control Process Trainer is a heated tank with RTD, SSR and controller. It is used for learning on-off and PID temperature control.

Technical specification

Output	SSR
Power Supply	230 V AC, 50 Hz, single phase

Temperature Control Process Trainer is a heated tank with RTD, SSR and controller. It is designed for learning on-off and PID temperature control. Key highlights include insulated stainless tank, pT-100 RTD sensor and solid state relay.

Features

- Insulated stainless tank
- PT-100 RTD sensor
- Solid state relay
- Integrated stirrer for reliable use
- PID controller

Technical Specifications

Tank	10 litre
Heater	2 kW
Temperature Range	Ambient to 90 deg C
Sensor	PT-100
Controller	PID with autotune
