| --- | --- |
| FMS Conveyor Transfer Module | CMI-NP-1684 |

## Description

FMS Conveyor Transfer Module is a modular belt conveyor with pallet stoppers and RFID readers for moving workpiece carriers between stations. It is used for teaching material transfer and station sequencing in a flexible manufacturing system.

## Technical specification

| | |
|---|---|
| Drive | 24 V DC gear motor |
| Identification | RFID 13.56 MHz |
| Controller | PLC |
| Power Supply | 230 V AC, 50 Hz, single phase |

FMS Conveyor Transfer Module is a modular belt conveyor with pallet stoppers and RFID readers for moving workpiece carriers between stations. It is designed for teaching material transfer and station sequencing in a flexible manufacturing system. Key highlights include belt conveyor with DC gear motor, pneumatic pallet stoppers and rFID read-write heads.

**Features**

- Belt conveyor with DC gear motor
- Pneumatic pallet stoppers
- RFID read-write heads
- Optical presence sensors
- Modular aluminium frame

**Technical Specifications**

| | |
|---|---|
| Conveyor Length | 1500 mm |
| Belt Width | 100 mm |
| Speed | 10 m/min |
