Product name:	Product code:
FMS Rotary Indexing Table Module	CMI-NP-1690

Description

FMS Rotary Indexing Table Module is a motor driven rotary indexing table with four work stations for sequential operations. It is used for demonstrating indexing, drilling and testing operations in a flexible system.

Technical specification

Controller	PLC
Sensors	Inductive
Power Supply	230 V AC, 50 Hz, single phase

FMS Rotary Indexing Table Module is a motor driven rotary indexing table with four work stations for sequential operations. It is designed for demonstrating indexing, drilling and testing operations in a flexible system. Key highlights include stepper driven rotary table, four stations at 90 degrees and proximity sensors for position.

Features

- Stepper driven rotary table
- Four stations at 90 degrees
- Proximity sensors for position
- Mountable drilling and testing heads
- Aluminium base plate

Technical Specifications

Table Diameter	300 mm
Stations	4
Indexing Accuracy	+/-0.1 deg
Drive	Stepper with gearbox
