NAUGRA®

Product name:	Product code:
ARM Cortex Microcontroller Training Kit	CMI-NP-1700

Description

ARM Cortex Microcontroller Training Kit is a 32 bit ARM Cortex-M development board with peripherals for experiments. It is used for teaching 32 bit embedded programming and peripherals.

Technical specification

Debug	USB, JTAG/SWD
Programming	C with IDE
Power Supply	230 V AC, 50 Hz, single phase

ARM Cortex Microcontroller Training Kit is a 32 bit ARM Cortex-M development board with peripherals for experiments. It is designed for teaching 32 bit embedded programming and peripherals. Key highlights include aRM Cortex-M3 core, gPIO, ADC, PWM, UART, SPI, I2C and tFT or LCD display.

Features

- ARM Cortex-M3 core
- GPIO, ADC, PWM, UART, SPI, I2C
- TFT or LCD display
- On-board debugger
- Sample programs

Technical Specifications

Processor	ARM Cortex-M3, 72 MHz
Flash	256 kB
Display	2.4 inch TFT
Peripherals	ADC, DAC, PWM, UART, SPI, I2C
