Product name:	Product code:
Modular Production PLC Control Panel	CMI-NP-1729

Description

Modular Production PLC Control Panel is a mobile panel with PLC, power supply and I/O terminals which controls modular production stations. It is used for wiring, programming and commissioning of production modules.

Technical specification

Panel	Steel
Input Supply	230 V AC, 50 Hz

Modular Production PLC Control Panel is a mobile panel with PLC, power supply and I/O terminals which controls modular production stations. It is designed for wiring, programming and commissioning of production modules. Key highlights include compact PLC with Ethernet, 24 V DC power supply and terminals with 4 mm sockets.

Features

- Compact PLC with Ethernet
- 24 V DC power supply
- Terminals with 4 mm sockets
- Emergency stop
- Start, stop and mode switches

Technical Specifications

PLC	Compact, 16 DI and 16 DO
Supply	24 V DC, 5 A
Interface	Ethernet
Programming	Ladder and function blocks
